

Short and to the Point Security Awareness

SIMPLY EXPLAINED

The average person has no chance spotting today's scams without being trained first. Wizer Security Awareness Training includes everything you need to train your team how to protect themselves against cyber attacks. And because Employees have such a short attention span when it comes to watching security awareness videos... all of our videos are 1-minute long and tell a story leaving people saying, "Hmm... interesting, I didn't know that". Our video training includes over 100 videos, quizzes, and progress reports. Our phishing simulation includes pre-configured templates, phishing statistics, and automatic campaigns. And our gamification makes it fun for your team to put into practice what they learned.

1-Minute Video, Short and to the Point

The benefit of 1-minute videos is that employees will not get bored quickly and tune out, instead they quickly learn the concepts and proceed on to the next video. They are able to understand faster, apply it right away, and remember longer.

Over 100 Training Videos Covering Topics Such As:

Mobile Security

Phishing

Ransomware

Social Media

Passwords

Public Wifi

HIPAA

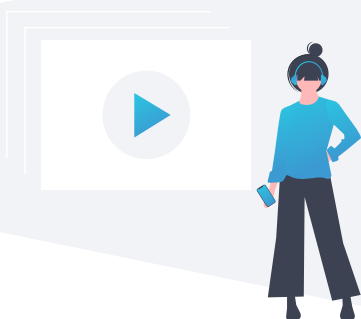

GDPR

Insider Threat

and much more...

Some Really Cool Features

Hmm... Interesting, I didn't know that!

Because people have such a short attention span when it comes to watching security awareness videos... all of our videos are 1-minute long and tell a story leaving people saying, "Hmm... interesting, I didn't know that." And we made it mobile-friendly because people spend so much time on their mobile phones.

Wizer Stories

Wizer Stories is a daily feed of curated stories from social media sites like LinkedIn, Twitter, and Reddit that are relatable to the everyday person, like how someone fell for a job scam and how to avoid it. These stories will keep your employees engaged, aware of current threats, and safe online.

Advanced Reporting

Important metrics presented in an easy to understand way. Quickly find out how employees and departments are progressing through the training.

Gamification

Game on! A mix of phishing and regular emails are displayed to the users. Can they spot which is which?

Phishing Simulation

Test your organization by sending them realistic fake phishing emails in an attempt to deceive them into clicking links to give up their credentials. The results of the phishing test can be used to help the organization gauge the risk and response rate of employees to a phishing attack.

Use Your Own LMS

Our videos are SCORM Compliant, so it's super easy to use them in your own learning management system (LMS).
